

PLEASE NOTE: THESE INSTRUCTIONS ARE PROVIDED AS A GUIDELINE ONLY TO ASSIST YOU CONFIGURING WIRELESS. IT STAFF ARE NOT PERMITTED TO WORK ON PRIVATELY OWNED LAPTOPS OR DEVICES.

1. Ensure your wireless radio is turned on.
2. From the Taskbar, left-click the **Wireless signal icon**. If this does not show up, navigate to **Start>Control Panel>Network and Internet>View network Status and tasks**. If you navigated to this location, continue to **Step 4**.

3. Once clicked, a separate box will open up. Click on the **Open Network and Sharing Center** link.

4. Once in the Network Sharing Center, select **Set up a new connection or network**.

5. Select **Manually connect to a wireless network** and then click **Next**.

6. Enter the following in the **Enter information for the wireless network you want to add** window:
 Network Name: **CAMPUS-AIR**
 Security Type: **WPA-Enterprise**
 Encryption type: **TKIP**
 Leave the **Security Key/Passphrase** box blank.
 Check the box to the left of **Start this connection automatically**.
 Leave the box to the left of **Connect even if the network is not broadcasting** unchecked and click the **Next** button.

7. In the **Manually connect to a wireless network** window, click on **Change Connection Settings**.

- In the **CAMPUS-AIR Wireless Network properties** window, select the **Connection** tab at the top. Check the box to the left of **Connect automatically when this network is in range**. The other two boxes should be unchecked.

- Click on the **Security** tab to configure the following:
 Security type: **WPA-Enterprise**
 Encryption type: **TKIP**
 Check the box to the left of **Remember my credentials for this connection each time I'm logged on**.
 Under **Choose a network authentication method**: choose **Microsoft:Protected EAP (PEAP)** and then click on the **Settings** button.

- In the **Protected EAP Properties** window, uncheck **Validate server certificate** under the **When connecting:** heading at the top. Under the **Select Authentication Method**, **Secured password (EAP-MSCHAP v2)** should be selected from the drop down menu. The check box to the left of **Enable Fast Reconnect** should be selected. The other two checkboxes should be unchecked. Click on the **Configure** button.

- In the **EAP MSCHAPv2 Properties** window, uncheck the box to the left of **Automatically use my Windows logon name and password (and domain if any)**.

- Click on the **OK** button at the bottom of this and the previous window(s) to apply the settings.
- A dialog box from your system tray will appear stating **Additional log on information is needed to connect to CAMPUS-AIR**. Click on this box.

- Enter your username in the format **oncampus\100*******, and then enter your network password. Your network password is the same password that you use to log into the computers on campus. You are now joined to the **CAMPUS-AIR** network.
